1. This data is the property of the Northern® Pump Division of McNally Industries LLC. It shall not be used, duplicated, or disclosed in whole or part with out the permission of Northern® Pump Division of McNally Industries LLC.
2. The dimensions and layout of the drawings and models are for information purposes only. The Northern® Pump division of McNally Industries LLC. does not accept liability for changes, damage, or costs incurred due to dimensional inaccuracies. Custom pumps may differ significantly from the dimensional data listed on the drawing contained.
3. Certain features and information may have been omitted for clarity.
4. CAD models may be available in other formats. Please contact us if you require another format.
5. The pump performance calculations and product information packets are available as a tool for establishing basic performance characteristics and design options for Northern® Pumps. Many additional factors that affect performance may not be contained in the information. Examples of these items include, but are not limited to:
 - Lubricity of the liquid
 - Presence of abrasives or particles in the liquid
 - Compatibility of the materials of construction and liquid being pumped
 - Size and availability of liquid delivered to the suction port of the pump
 - Please click to chat or call the factory to verify the predicted performance
